The customer must request the color for writing on cakes. If a color is not specified on the order, chocolate ganache (dark brown) or white vegan frosting will be used. Other colors that may be requested are light brown (chocolate buttercream), yellow, blue, green, orange, and pink. Raspberry jam will not be used for the writing, due to its tendency to weep. A true red color from our natural food coloring is not possible.

We use natural food colors made from vegetables, seeds and other plant-based ingredients. Natural colors, unlike artificial colors, can be affected by other ingredients that will change the hue by making it brighter, duller or changing the tint. Because of this we cannot guarantee that the color you requested will be exactly as you may have imagined. Due to our stringent food safety and product policies we cannot use ingredients unless they are supplied by our approved vendors.
